<u>Deegan-Day Design & Architecture</u> designed the **4/Way House**, a remarkable weekend home that not only takes full advantage of its natural location, but also provides effective protection from potential wildfires with the help of RHEINZINK prePATINA ECO ZINC graphite-grey. The single-family home spans a generous 2,250 square metres and sits majestically on a sprawling 2.5-hectare plot located on a southeast-facing ridge in the picturesque Santa Monica Mountains.
