RHEINZINK

This chapel is nestled in the vineyards on the slope of Selzer Berg in the direction of Zornheim. "Lichtefeld" is the name of Lisa Denecke's design, which was selected by a committee for the chapel donated by Mr. and Mrs. Eckes. The Wiesbaden-based architectural firm KISSLER EFFGEN + Partner implemented the construction plan. In collaboration with six craftsmen, the chapel was realized as a wood and glass construction in an eight-month construction period. In keeping with the natural materials used, RHEINZINK standing seam panels in prePATINA graphite-grey clad the roof of the chapel. Particularly in winter, when the vineyards and the surrounding villages are covered in snow, the view is magnificent and contemplative.
